

Md Rashid Siddique

FULL STACK SOFTWARE ENGINEER | React.js | Node.js | TypeScript | JavaScript

✉ rashid120152@gmail.com ☎ 9608517238 📍 Chandigarh 🌐 LinkedIn 🐙 GitHub 📁 Portfolio 🏆 LeetCode

👤 PROFILE

Full Stack Software Engineer with **3 years of experience** building and deploying SaaS and enterprise web applications using **React.js, JavaScript, TypeScript, Node.js, Express.js, NestJS, Angular, PostgreSQL, and MongoDB**. Experienced in developing end-to-end features across frontend, backend, databases, authentication, RBAC, dynamic workflows, dashboards, third-party integrations, and AI-powered document processing.

📁 EXPERIENCE

Software Development Engineer-I, Agnext Technologies

03/2025 – present | Mohali, India

- Built and enhanced a **configurable multi-client SaaS platform**, developing **50+ REST APIs and 10+ enterprise features** supporting **500+ workflows, 5,000+ forms, 25+ clients, and 1,000+ users**.
- Built **React.js + TypeScript** interfaces using Redux Toolkit/Saga, reusable components, dynamic forms, dashboards, responsive UI, and API integrations for complex enterprise workflows.
- Developed **Node.js backend services** using Express.js/NestJS, PostgreSQL, and MongoDB, implementing JWT authentication, RBAC, webhooks, scheduled/background processing, and database optimization.
- Reduced frontend page-load time from **8-10s to 1-2s** through lazy loading, virtualization, memoization, API-call optimization, debouncing, and throttling.
- Reduced API response time from **6-7s to 800-900ms** through API/query optimization, caching, asynchronous processing, and database improvements.
- Integrated **Google Gemini API** for laboratory-report processing across **300+ laboratories**, reducing manual report-processing effort by approximately **90%**.
- Integrated **Redis, WebSockets/Socket.IO, Firebase, OpenStreetMap, and Blockchain APIs** for caching, real-time features, notifications, location/address workflows, and data verification; deployed production features using **Docker and GitHub Actions/CI/CD**.

Software Engineer (Consultant), MountBlue Technologies (Client: AgNext)

02/2024 – 02/2025 | Mohali, India

- Developed a full-stack inspection platform used by **1,000+ client auditors** for warehouse and truck inspections using **Angular, JavaScript, Node.js, and REST APIs**.
- Developed backend APIs and business workflows for capturing, processing, and managing **warehouse and transportation inspection data** across multiple clients.
- Implemented **configurable report-generation workflows** based on client-specific business and reporting requirements.
- Developed **GPS/location movement tracking and selfie-based attendance marking** for auditors to support field-audit operations.

Software Engineering Intern, MountBlue Technologies

10/2023 – 02/2024 | Bangalore, India

- Completed intensive software-engineering training covering **data structures, frontend development, backend development, Git, testing, debugging, and software development practices**.
- Built web applications using modern frontend and backend technologies with emphasis on clean code, testing, and collaborative development.

📁 PROJECTS

MediConnect – Healthcare Platform

05/2026 – 06/2026

React • Node.js • Express • MongoDB • Redux Saga • JWT • Razorpay • Swagger • Cloudinary

- Independently built and deployed a full-stack healthcare platform with **50+ REST APIs and 30+ frontend pages** supporting **Patient, Hospital Admin, and Super Admin** roles.
- Implemented appointment workflows, authentication, Redux Saga state management, MongoDB models, and **Razorpay order, payment, refund, and webhook** integrations. [GitHub](#) 📄 [Live](#) 📄

🧠 SKILLS

- Frontend:** React.js, TypeScript, JavaScript, Redux Toolkit, Redux Saga, HTML5, CSS3, Responsive UI, Reusable Components, WebSockets/Socket.IO, Angular
- Backend:** Node.js, Express.js, NestJS, Python, FastAPI, REST APIs, API Integration, JWT, RBAC, Webhooks, Cron Jobs
- Databases:** PostgreSQL, MongoDB, SQL, MySQL
- AI & Integrations:** Google Gemini API, Firebase, OpenStreetMap, Blockchain APIs, Razorpay
- Testing & Tools:** Jest, Vitest, Playwright, Swagger, Postman, Git, GitHub
- Engineering:** Agile/Scrum, SDLC, Code Review, Unit Testing, Production Debugging, Feature Ownership, **200+ DSA Problems on LeetCode**

🎓 EDUCATION

Bachelor of Technology (B.Tech.) in Computer Science, Lovely Professional University

08/2020 – 08/2024 | Jalandhar, Punjab

📄 CERTIFICATES

- Data Structures and Algorithms – GeeksforGeeks 📄
- Database Management Systems (DBMS) — Infosys Springboard 📄
